***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02-23-2004 has been entered.

***Double Patenting***

Claims 110-113 are maintained as provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11, 13, 14 and 16 of copending Application No. 09/310,735 for the reasons of record set forth in the prior Office action mailed 10-22-2002.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Response to Arguments***

Applicant's arguments filed 09-23-2003 have been fully considered but they are not persuasive.

In response to the rejection of record of claims 110-113 under obviousness type double patenting, Applicant argues that a the prior Examiner in the case withdrew the Double Patenting rejection in response to a Terminal Disclaimer that was filed and

accepted, however, the Terminal Disclaimer does not appear to have been filed or accepted and, therefore, this rejection is maintained.

### ***Withdrawn Rejections***

The rejection of record of claims 110-113 under 35 U.S.C. 101 and under 35 U.S.C. 112, first paragraph set forth in the prior Office action (mailed 10-22-2002) based on a lack of substantial utility is withdrawn in response to Applicant's arguments and amendments. The specifically claimed oligonucleotides are part of well characterized IL-2 genes and there is no evidence to suggest that these oligonucleotides could not be used specifically as a gene probe for IL-2 or in the screening assays Applicant discloses as a potential specific use for these oligonucleotides.

### ***Conclusion***

This is a RCE of applicant's earlier Application No. 09/310,844. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 1635

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
